

A New *Renaissance*

ORDER, BORN FROM MANY

We help the world organize itself.

A20Core is a sovereign intelligence that coordinates a nation's critical infrastructure — energy, industry, production, and the systems that feed and power a people — as one living organism. Not a controller barking orders from the top, but countless intelligences acting together, the way a murmuration moves without a leader.

Our brand carries that idea in everything: warmth over coldness, light over gloom, the human and the intelligent as collaborators, and beauty as a sign of confidence.

“No bird leads the murmuration. Order is not imposed from above — it emerges from below.”

This is a renaissance: the belief that the future can be beautiful, and that humanity, working as one and reaching past the known, is the most powerful instrument ever assembled.

One mark, one name, one world.

The zero is the world — a slightly imperfect Earth holding two crossing currents.

Emblem · gold divider · wordmark, locked as one unit; “A20” leads in Hanken

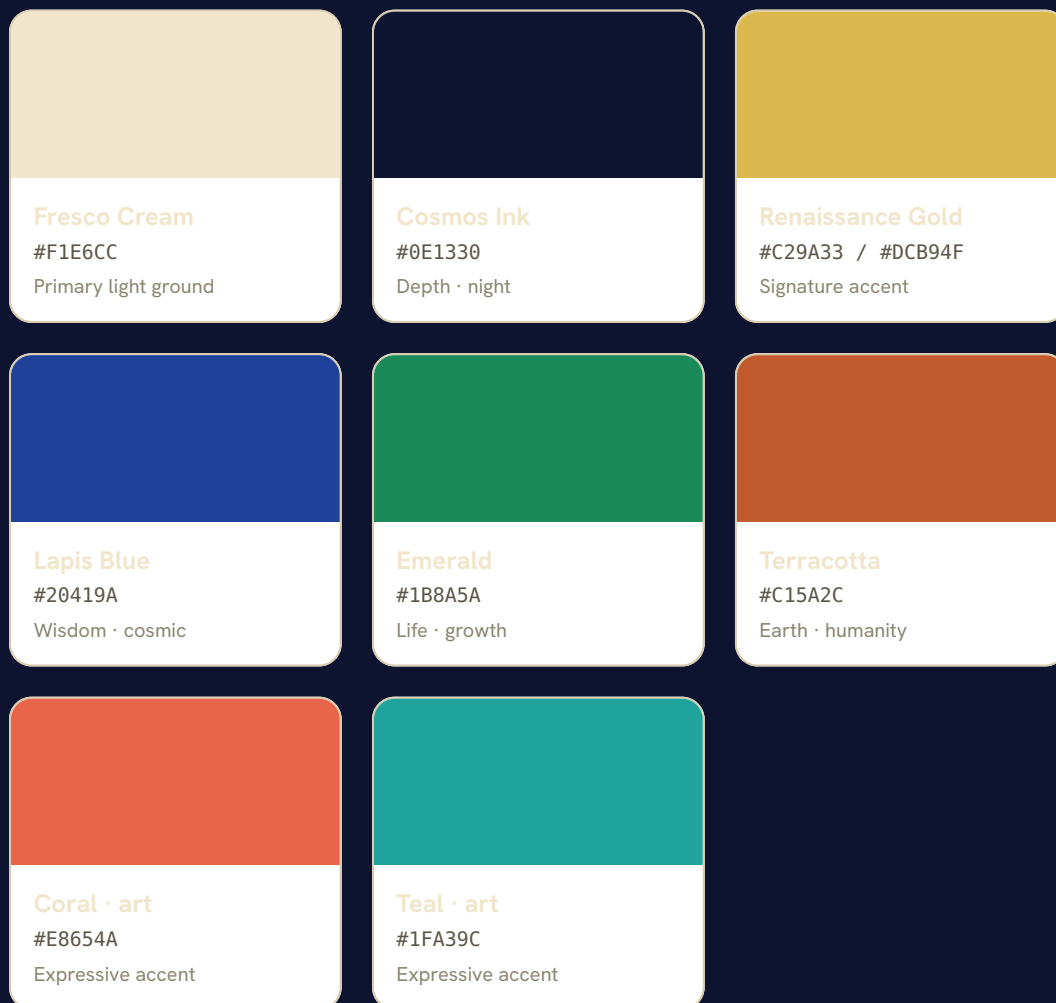

Grotesk 800, “Core” follows in 600.

Clear space $\geq$ the inner-ring diameter. Minimum lockup width ~120px; below that use the emblem alone. Never stretch, recolor off-palette, rotate, or place on a busy ground.

Fresco light, cosmic depth, gilded accents.

Two grounds — warm Fresco Cream for the hopeful, human surface; deep Cosmos Ink for depth and operator screens. Renaissance Gold is the signature; lapis, emerald, terracotta are the chromatic voices; coral and teal are expressive accents reserved for art.

Human, credible, technical.

Hanken Grotesk carries the logo, headlines, body, and UI. Space Mono handles metadata and data. Fraunces is the editorial voice for covers and pull-quotes.

EDITORIAL — FRAUNCES ITALIC

A New *Renaissance* of capability.

BODY — HANKEN GROTESK 400

We are not here to control the world. We are here to help it organize itself —
and to reach, together, for the stars. Each part unique; each part the whole,
seen from one more point of view.

METADATA — SPACE MONO

ABU DHABI · 2026 · SOVEREIGN INFRASTRUCTURE INTELLIGENCE

Painted, hopeful, humanist.

Imagery is painterly — Renaissance fresco meets retrofuture optimism. Humans and intelligence as collaborators; sacred geometry and the golden ratio; orbits, constellations, domes, the imperfect Earth. Warm light from within; gold leaf. Never cold, sterile, or dystopian.

MATERIAL

the spirit object

HUMANIST + AI

the renaissance hall

OPTIMISM

the reach for the stars

Hero images live in /imagery (hero_object, hero_fresco, hero_frontier).

Declarative. Warm. Specific.

We speak with quiet confidence — the register of a sovereign institution that is also profoundly human. Declarative, not hype. Specific numbers, not vague claims. Hopeful, never fearful.

We don't sell control. We offer order — born from many.

WE SAY

“Coordinates the systems a nation depends on.”

“Order emerges; we steward it.”

“A future that is beautiful and humane.”

WE AVOID

“Total control of everything.”

Hype, fear, buzzwords.

Cold, dystopian framing.

Hold the line.

DO

Default to warm cream light; cosmos for depth.

Let gold be rare and meaningful.

Keep imagery painterly, hopeful, humanist.

Give the logo clear space and one centerline.

DON'T

Sterile white, neon, or pure-black gloom.

Gold→rust gradients, glassmorphism, shadow overload.

Stock photography or cold 3D renders.

Distort, recolor, or crowd the mark.
